## DETAILED ACTION

This is a Final Office Action. Claims 1-6 are pending below.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Janesky (U.S. Patent No. 6,672,016)

Claim 1: Janesky discloses a drain panel assembly having a plastic drain panel (Fig. 2: generally: Abstract, line 5) having an upper panel section (13) extending vertically up from a lower skirt section (15), the upper section is adjacent a basement wall (11) and spaced by spacers (18), the lower skirt extends outwardly form the upper panel section away from the wall and contacts the footing section (via 20a) so that an outer surface of the skirt faces away from the upper panel section to form a longitudinal water conduit (15a, 23) extending along the length of the footing, the conduit being provided with a plurality of

Art Unit: 3635

spaced drain openings (23) for draining water over the footing surface. Applicant should note that only the panel assembly is claimed. The phrase "adapted to control...supporting footing", lines 1-4, is a statement of intended use of the claimed invention and must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Claim 2: the lower skirt section (15) has a cover means (14) for shielding each drain opening and the footing surface.

Claim 3: the cover means has spaced narrow shield strips (a strip is a row of depressions 20) of plastic that provide a passage between its underside and surface of the footing, the passage communicates between one of the drain openings and the edge of the footing.

Claim 4: the shield strip has a plurality of spaced depressions (20) extending to contact the footing and provide the water-flow passage, and the depressions are capable of receiving concrete.

Claim 5: the cover means is a shield strip having standoff ribs (20a) that support the strip on the footing to provide a flow space between a drain opening and the edge of the footing.

Art Unit: 3635

Claim 6: the conduit (15a 23) extends along a length of the footing and wall interface and is continuous without obstruction to flow of water along the length of the footing (see Fig. 3 where the water travels unobstructed through openings 15a, 23)

## Response to Arguments

2. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

## Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/798,120 Page 5

Art Unit: 3635

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William V. Gilbert whose telephone number is 571.272.9055. The examiner can normally be reached on Monday - Friday, 08:00 to 17:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on 571.272.6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
